

CONTENTS

Katsuo Takano: An application of weighted norm inequalities for maximal functions to semigroups of convolution transforms on  $L^p_\omega(R^n)$ ..... 151

Yumiko Hironaka-Kobayashi: Class groups of group rings whose coefficients are algebraic integers ..... 157

Masazumi Hanazawa: On Aronszajn trees with a non-Souslin base..... 177

Katsuya Eda: A Boolean power and a direct product of abelian groups .. 187

Shoji Morimoto: Weakly divisible and divisible modules ..... 195

Akito Tsuboi: On reflection principles..... 201

Saburô Uchiyama and Masataka Yorinaga: On the difference  $f^g(x) - g^g(x)$  215

Takao Hoshina: Countable-points compactifications of product spaces..... 231

Jiryô Komeda: On the existence of Weierstrass points with a certain semigroup generated by 4 elements ..... 237

Izumi Kuribayashi: On certain curves of genus three with many automorphisms ..... 271

Mitsuo Hoshino: Happel-Ringel's theorem on tilted algebras ..... 289

Yasuhiko Takehana:  $V$ -rings relative to hereditary torsion theories ..... 293

Howard D. Fegan and Stephen P. Peterson: Kostant's weighting factor in Macdonald's identities ..... 299

Akito Tsuboi: On  $M$ -recursively saturated models of arithmetic ..... 305

Akira Koyama: Various compact multi-retracts and shape theory ..... 319
