

CONTENTS

Mitsuo Hoshino: Selfinjectivity of rings relative to Lambek torsion theory	1
In-Bae Kim and Tsunero Takahashi: Isoparametric hypersurfaces in a space form and metric connections.....	15
Toshiaki Adachi and Sadahiro Maeda: Global behaviours of circles in a complex hyperbolic space	29
Nobuyuki Fukuda: Semisimple Hopf algebras of dimension 12	43
Toshiharu Kobayashi and Akira Masuoka: A result extended from groups to Hopf algebras	55
Akihiko Miyachi: Atomic decomposition for Sobolev spaces and for the C_p^s spaces on general domains.....	59
Tadeusz Dobrowolski and Witold Marciszewski: Rays and the fixed point property in noncompact spaces.....	97
Juan de Dios Pérez: A characterization of geodesic hyperspheres of quaternionic projective space	113
Nguyen To Nhu and Tran Van An: LC-decomposability and the AR-property in linear metric spaces	117
Takao Komatsu: The sum of consecutive fractional parts.....	129
Kentaro Wakai: Reduction property and dimensional order property	139
Shin Kato: Structure theorems of the scalar curvature equation on subdomains of a compact Riemannian manifold	153
Luís J. Alías, Francisco J.M. Estudillo and Alfonso Romero: Spacelike submanifolds with parallel mean curvature in pseudo-Riemannian space forms.....	169
Tatsuhiko Yagasaki: PL approximations of fiber preserving homeomorphisms of vector bundles	181
Takashi Oguro: On almost Kähler manifolds of constant curvature	199
Juan de Dios Pérez: A characterization of almost-Einstein real hypersurfaces of quaternionic projective space	207
H. J. Baues, K. A. Hardie and K. H. Kamps: The self-equivalence groups in certain coherent homotopy categories	213
Masaaki Umehara and Kotaro Yamada: A duality on $CMC-1$ surfaces in hyperbolic space, and a hyperbolic analogue of the Osserman Inequality	229
Hiroshi Hosokawa: Induced mappings on hyperspaces	239
G.L. Itzkowitz and D. Shakhmatov: Haar nonmeasurable partitions of compact groups	251
