

CONTENTS

	Page
Sampei USUI: Recovery of vanishing cycles by log geometry.....	1
Yoshitaka ODAI and Hiroshi SUZUKI: The rank of the group of relative units of a Galois extension	37
Hideo KOZONO: Weak solutions of the Navier-Stokes equations with test func- tions in the weak- L^n space	55
Kai LIU and Anyue CHEN: Moment decay rates of solutions of stochastic differ- ential equations	81
Dimitrios I. DAIS, Christian HAASE and Günter M. ZIEGLER: All toric local complete intersection singularities admit projective crepant resolutions	95
Jorge J. BETANCOR and Krzysztof STEMPAK: Relating multipliers and trans- plantation for Fourier-Bessel expansions and Hankel transform	109
Koji TOJO: Totally real totally geodesic submanifolds of compact 3-symmetric spaces	131
Toshiyuki AKITA: Homological infiniteness of decorated Torelli groups and Torelli spaces	145
Máximo CARRERAS and Marcos SALVAI: Closed geodesics in the tangent sphere bundle of a hyperbolic three-manifold	149
Yuefei WANG: On the Fatou set of an entire function with gasp	163
