

CONTENTS

	Page
C. NAYAK, S. PATTANAYAK AND M. N. MISHRA, Random Fourier-Stieltjes series associated with stable process.....	1
K. NAKAGAWA, Behavior of solutions for the linearized Navier-Stokes equations with vanishing viscosity.....	17
U-H. KI AND H. NAKAGAWA, A characterization of the Cartan hypersurface in a sphere.....	27
S. SATO, Lusin functions on product spaces.....	41
F. UCHIDA, On a method to construct analytic actions of non-compact Lie groups on a sphere.....	61
S. MURAKAMI, Almost periodic solutions of a system of integrodifferential equations.....	71
I. VAN DE WOESTIJNE AND L. VERSTRAELEN, Semi-symmetric Lorentzian hypersurfaces.....	81
S. LU, The range and pseudo-inverse of a product.....	89
S. KOBAYASHI, Submersions of CR submanifolds.....	95
J. S. CHAHAL, The Mordell-Weil rank of elliptic curves.....	101
K. SAKAN, A fundamental variational lemma for extremal quasiconformal mappings compatible with a Fuchsian group.....	105
A. INOUE, Strong and classical solutions of the Hopf equation —an example of Functional Derivative Equation of second order.....	115
